

SuperMart POS

Scan. Total. Print. Your counter keeps moving.

Billing and stock software for Indian retail: keyboard-first barcode billing, GST invoices with a CGST/SGST split, live stock with a full ledger, and the reports your accountant asks for. It runs in the browser on the PC you already have.

The screenshot displays the SuperMart POS interface. The main window shows a list of products with columns for #, PRODUCT, QTY, PRICE, DISCOUNT, TAX, and TOTAL. The products listed are Aashirvaad Atta 5kg, Fortune Sunflower Oil 1L, Amul Taaza Milk 1L, and Britannia Good Day 200g. The total amount is ₹558. A sidebar on the right shows the tax breakdown: Gross, Item discount, Taxable, CGST, and SGST. A green button at the bottom right says 'PAY ₹558'.

or — Tax

A GST invoice your accountant will not send back

Tax is worked out per line, at the rate on the product, and split into CGST and SGST on the printed bill. HSN codes carry through to the invoice, and the rate-wise summary is the one your return asks for.

- ✓ Inclusive or exclusive pricing — your choice, per product
- ✓ Rate-wise taxable value and tax, ready to file
- ✓ A4 tax invoice, or a 58 mm/80 mm thermal receipt

The bottom right corner shows a preview of a printed tax invoice with a green checkmark and the text 'Filing ready'.

OVERVIEW

Scan. Total. Print. Your counter keeps moving.

SuperMart POS is barcode billing built for a real queue. The billing screen is keyboard-first: scan, total, tender and print without the hand leaving the scanner. Weighing-scale labels are read straight into the bill, payment can be split across cash, card, UPI and credit, and a bill can be held while the next customer is served. It is not a general accounting package with a till added on: every screen was built for the way a counter works.

Tax is worked out per line at the rate on the product and split into CGST and SGST on the printed bill, with HSN codes on the invoice and a rate-wise summary ready for the return. Every sale, purchase, return, adjustment and transfer moves stock the moment it happens and writes a ledger line recording what, how much, who, when and why. Batches carry their cost and expiry and are sold oldest first.

Away from the till, the same system handles purchase entry, suppliers and dues, customer accounts and loyalty points, shifts and the cash drawer, and reports on sales, profit, tax, inventory and payments. One catalogue serves every branch with separate stock per store. Roles decide what each person can reach, discount ceilings are enforced on the server, and every record belongs to one business only.

WHO IT IS FOR

Supermarkets and kirana stores

Fast keyboard scanning, scale labels for loose goods, split tender across cash, card and UPI, and a low-stock list short enough to walk the aisles with.

Pharmacies

Cost and expiry tracked per batch, the oldest stock offered first, near-expiry items listed in advance and customer purchase history on hand.

Bakery and fresh produce

Scale labels decoded into quantity and price, decimal quantities keyed by hand, your own barcode labels and day-end wastage recorded with a reason.

Hardware and electronics

Search across a large catalogue, purchase entry that keeps cost accurate, supplier dues and payments, and margin you can see line by line.

Barcode billing

Scan, total, tender, print — without touching the mouse. Weighing-scale labels are read automatically.

Thermal receipt with CGST/SGST split

TAX INVOICE - COUNTER 1

Basmati rice 5kg	545.00
Toor dal 1kg	162.00
Tomato 0.756kg	30.24
CGST 2.5%	8.86
SGST 2.5%	8.86
TOTAL	₹737.24

Barcode billing

Scan, total, tender, print — without touching the mouse. Weighing-scale labels are read automatically.

TAX INVOICE - COUNTER 1

Basmati rice 5kg	545.00
Toor dal 1kg	162.00
Tomato 0.756kg	30.24
CGST 2.5%	8.86
SGST 2.5%	8.86
TOTAL	₹737.24

GST done properly

CGST/SGST split on every line, HSN codes on the invoice, and a return-ready summary by rate.

Live stock

Every sale, purchase and adjustment moves stock the moment it happens, and writes a ledger line.

Sale #1042	-2
Purchase from supplier	+48
Stocktake: breakage	-1

Reports that answer questions

What sold, what is not moving, what it cost you, and what you actually made on it.

Shift reconciliation

Open with a float, close with a count. The drawer difference

Everything a shop runs on

Prices decided on the server

A till cannot invent a discount. Every price, tax and stock check is settled by the server, every time.

KEY FEATURES

Built for the way **you actually work.**01 **Keyboard-first barcode billing**

Search by barcode, name or code with the till holding focus. Scan, total, tender and print without touching the mouse, hold a bill and bring it back, and take returns against the original bill.

02 **GST invoices done properly**

Tax per line at the product's rate, a CGST/SGST split on every bill, HSN codes on the invoice, inclusive or exclusive pricing per product, and a rate-wise summary ready for the return.

03 **Weighing-scale labels and loose goods**

Scale labels are decoded into the right weight and price. Decimal quantities can be keyed by hand, and you can print your own barcode labels for unbarcoded goods.

04 **Live stock with a full ledger**

Sales, purchases, returns, adjustments and transfers move stock as they happen. Each movement leaves a ledger line you can trace back to the bill that caused it.

05 **Batch and expiry tracking**

Cost and expiry are tracked per batch, near-expiry stock is listed in advance and the oldest stock is sold first.

06 **Purchases, suppliers and dues**

Purchase entry updates stock and cost price, so the margin report is accurate. Supplier dues, payments and purchase returns are recorded against the bills they belong to.

07 **Shift reconciliation**

Each counter is its own till with its own drawer. Open with a float, close with a count, and the difference is recorded per cashier, per shift.

08 **Roles, discount ceilings and an audit trail**

Cashier, manager, stock keeper and accounts roles each see only their screens. Prices, taxes and discount limits are settled on the server, and cancelled bills, price changes and stock adjustments are logged with name and time.

MODULES

Everything in **one system.**■ **Billing counter**

Barcode, name or code search, scale labels, split payment across cash, card, UPI and credit, held bills, returns and exchanges.

■ **GST & invoices**

Per-line CGST/SGST, HSN codes, an A4 tax invoice or a 58 mm or 80 mm thermal receipt, printed or reprinted later.

■ **Stock & ledger**

Live stock, reorder levels, low-stock and out-of-stock lists, batches with expiry and stocktake adjustments that record the difference.

■ **Purchases & suppliers**

Purchase entry, supplier accounts and dues, payments against bills and purchase returns.

■ **Customers & loyalty**

Customer accounts with history and credit, and loyalty points earned and redeemed with a ledger behind every balance.

■ **Shifts & cash drawer**

Float in, count out, with the drawer difference recorded per cashier and shift.

■ **Reports**

Sales by day, counter, cashier, product or category, profit, tax, inventory valuation and payments, each exportable to CSV.

■ **Branches & control**

One catalogue with separate stock per branch, transfers that must be received, roles, discount ceilings and an audit trail.

A GST invoice your accountant will not send back

Tax is worked out per line, at the rate on the product, and split into CGST and SGST on the printed bill. HSN codes carry through to the invoice, and the rate-wise summary is the one your return asks for.

- ✓ Inclusive or exclusive pricing — your choice, per product
- ✓ Rate-wise taxable value and tax, ready to file
- ✓ A4 tax invoice, or a 58 mm/80 mm thermal receipt

The screenshot shows a 'TAX INVOICE' for 'Manager's Store' dated 14 Sep 2021. It lists items like 'Bottle of T.L.' and 'Canned T.M.' with their respective prices and taxes. A 'Summary by rate' table is also visible, showing taxable value, CGST, SGST, and total amounts.

Item	Price	Tax	Total
Bottle of T.L.	100.00	10.00	110.00
Canned T.M.	100.00	10.00	110.00
Total	200.00	20.00	220.00

QUESTIONS BUYERS ASK

Does it produce GST invoices?

Yes. Tax is worked out per line at the product's rate and split into CGST and SGST, HSN codes carry through to the invoice, and the rate-wise summary of taxable value and tax is ready for your return.

Will it work with my scanner and printer?

Almost certainly. It runs in a browser with nothing to install, and any USB scanner that types the code and sends Enter works. Receipts print on a 58 mm or 80 mm thermal printer and A4 tax invoices on any printer you already have.

Does it handle batch and expiry for pharmacies?

Yes, on the Growth and Chain plans. Cost and expiry are tracked per batch, near-expiry stock is flagged and the oldest stock is sold first.

PLANS & GETTING STARTED

Choose a plan. **We set it up for you.**

Starter

One store, one counter. For a single shop finding its feet.

₹1,499

per month · ₹14,990 a year

- ✓ 1 store and 1 billing counter
- ✓ 3 staff logins
- ✓ 500 products
- ✓ 3,000 bills a month
- ✓ Barcode billing and GST invoices
- ✓ Held bills, discounts and sales returns
- ✓ Stock and the full ledger
- ✓ Basic reports: daily sales, stock on hand, GST summary

MOST POPULAR**Growth**

Up to 3 stores and 6 counters, with purchases, suppliers and customer accounts.

₹2,999

per month · ₹29,990 a year

- ✓ 3 stores and 6 billing counters
- ✓ 15 staff logins
- ✓ 5,000 products
- ✓ 25,000 bills a month
- ✓ Everything in Starter
- ✓ Weighing-scale labels and loyalty points
- ✓ Purchases, suppliers and purchase returns
- ✓ Customer accounts
- ✓ Batch and expiry tracking
- ✓ Stock transfers between stores
- ✓ Your own web address

Chain

Ten stores and 50 counters, with advanced reports and analytics.

₹4,999

per month · ₹49,990 a year

- ✓ 10 stores and 50 billing counters
- ✓ 60 staff logins
- ✓ 50,000 products
- ✓ 200,000 bills a month
- ✓ Everything in Growth
- ✓ Advanced reports: profitability, ABC analysis, trend comparison
- ✓ Analytics across stores and periods
- ✓ Priority support
- ✓ Your logo and colours on the app and receipts

Taxes extra where applicable. Your product is ready within 6 to 24 hours of payment.

1

Book a demo

See SuperMart POS with your own products on the screen and tell us how many stores, counters and items you have.

2

A dedicated DV Soft team sets it up

Your business, stores, counters, staff logins and roles, with your existing product list imported from a CSV file.

3

Training on your own catalogue

Cashiers, managers, stock keepers and accounts staff each learn the screens their role uses, on your products rather than a demo list.

4

Go live, with 24/7 support

Count the float in and start billing. Stock, GST and the day's numbers update from the first bill, with the DV Soft team on call around the clock.

**A dedicated team**

One team from the first call to go-live and beyond.

**Live in 6 to 24 hours**

Set up for you after payment, with your data moved in.

**Training included**

Hands-on sessions for every role until staff are confident.

**24/7 support**

Phone and WhatsApp, during and after go-live.
